Project Title : Face Recognition , Attendance System

Role : Team Leader

Description: The Tridaily Attendance Management System (using facial recognition) is a project which focuses on granting attendance to its users whose facial features have already been trained to the system such that the system grants attendance based on the physical presence of a person. This project mainly focuses on automating the task of maintaining attendance records which is usually done by teachers/professors on a daily basis, which is later updated to a database by integrating both maintenance and updation of attendance records into a single-step process, thereby saving time for both the students and the teachers.
